

The AutoEDMS Quick Start Program includes:

- ✓ 5-user network license of AutoEDMS, providing viewing and printing support for over 200 file formats, including Office files, CAD files, scanned images, Acrobat PDF files and more.
- ✓ 5-user network license of the AutoEDMS Workflow Engine (integrated workflow tool that automates the routing and approval of documents).
- ✓ 1-license of the AutoEDMS Redline/Compare Tool (floating license).
- ✓ 5 days of on-site, expert consultation, development and training services. Your AutoEDMS representative will analyze your pilot system requirements, develop the specific implementation plan, install AutoEDMS on your network, customize database and workflow models, train your users, import your existing documents and get your initial document management system up and running.
- ✓ 12-month All-in-One-Plan (One year of free upgrades).
- ✓ One year of technical telephone support.

The AutoEDMS Quick Start Program is a very affordable, low-risk and quick way to implement a customized, 5-user document management system, based on your requirements, for a fixed cost. ACS' field-proven, Quick

Start methodology will help you lay the foundation for your expanded document management system. It can be quickly implemented for use as a fully working EDMS solution, before rolling it out as a full production EDM system.

By staying in touch with our customers, our products are built with the solid dependability and complete flexibility that they demand, crucial for today's world of fast changing technology, and ever increasing customer requirements.

Talk to ACS about how AutoEDMS provides a document management and workflow solution that is flexible and robust enough for every stage of your company's lifecycle.

Established in 1981, ACS Software has been in the business of providing document management solutions for over 17 years. We're familiar with the real-world needs of our clients, and we make it a point to keep it that way.

SOFTWARE INC.

Don't just take our word for it.....

"Before we started, I read a lot of horror stories about implementing a DMS and how many installations were never successful for one reason or another. Now, after installing a new CAD System, AutoEDMS, and being involved with implementing a new manufacturing system in less than one year, the secret to our success was planning, planning, and more planning. Take the time to learn the product. Develop a highly detailed Pilot scope with goals (A big thanks to ACS for their persistence to make us clearly define our scope), and utilize the experience of your software vendor. We were extremely lucky or should I say fortunate to find a company like ACS Software that knew their product and could adapt it to our business model. With their help, I can rate our success at a solid 10. "
